Student Exchange Program
TUM, Munich.
2011

PROFILE

I find the underlying concepts of Architecture & UX design very similar - from research to documentation to team dynamics and construction.

My approach to design is very grounded in user research and focused on human experience rather than just building a product and environment.

I am a designer, dedicated to work towards achieving goals and to carefully create products that bring positive change into people's lives.

WORK EXPERIENCE

Assistant Designer
April 2018 - October 2020

KENK Architecten B.V., Amsterdam

- Worked on various large scale projects, including luxury apartments with commercial spaces, student housing, multi-family housing, housing for the refugees.
- Worked on all the design process which includes working from preliminary design phase, building permit drawings to the construction drawings.
- A great experience learning about the Users from Dutch housing market.
